

DATA SHEET

Ref. 1888-DAR2.5/C

Device mod. 'SIOUX'. Mini-block retractable lifeline.

Characteristics: Retractable anti-fall device with 2.5 metre band and energy absorber

The device has a blocking, tension and recoil system to which the worker stays attached if the device detects a fall during work, and automatically recoils once it remains loose.

The casing model, protects the mechanism against blows and the worker in the event of collision with the mechanism.

Maximum overall length of 2.5 meters.

To adapt to connectors that comply with EN362 (not included).

Uses and functions: as a retractable anti-fall element, preventing the blocking of the band, detecting a fall if this winds up happening. (Distance of 2 meters).
