

Meeting your safety and environment needs with turnkey solutions

Thomas Safety Ltd. provides a full range of environment, safety, and emergency services and equipment so that your operations can continuously meet compliance requirements.

Based on years of experience and partnerships with the world's leading service and equipment suppliers, Thomas Safety offers top-notch, turnkey solutions for industry, marine, offshore, and energy operations. We consult, plan, and deliver customized service and equipment packages to cover each customer's health, safety, security, and environment (HSSE) control and compliance needs.

Fire Fighting Equipment (FFE)

We accompany each customer from fire safety planning and equipment supply to installation and ongoing maintenance. Periodic equipment compliance checks ensure that all fire extinguishing systems, sprinklers, fire suppression systems and kitchen fire safety systems are operated and maintained according to legislated standards.

Emissions and Air Pollution Monitoring and Control Systems

Thomas Safety provides state-of-the-art customized emission monitoring and reduction systems for industrial applications, in compliance with local regulations.

Personal Protective Equipment (PPE)

Avoiding personal injury in hazardous environments requires robust protective equipment. Thomas Safety offers top-of-the-line PPE that you can rely on, including helmets, goggles, face shields, earplugs, earmuffs, respirator masks, gloves, and protective suits.

Hazard Control Equipment

We bring our customers the highest standards of service and equipment for hazard control from the world's leading manufacturers, including in-transit hazmat leak detection and communication solutions, portable and fixed gas detectors, flame and smoke detectors.

Meeting your safety and environment needs with turnkey solutions

Operations management and tracking — TrackSafety™

All of our services are managed by the TrackSafety™ system — a unique cloud-based operations management and tracking tool for Thomas Safety customers. With a simple, user-friendly interface, the system allows you to keep track of all your safety and compliance documentation and procedures.

TrackSafety features include tracking regulatory documentation and certification; documenting and tracking events and tasks; reporting and tracking equipment faults and breakdowns; equipment and inventory management; and more.

Benefiting your operations

- **Time saving.** Put an end to the endless search and interaction with multiple service providers, suppliers, vendors, regulatory agencies.
- **Cost efficiency.** Continuous and punctual service to prevent delays in your operations scheduling, production cycles and customer service.
- **Accessible & available.** One point of contact and punctual response from certified professionals for all your inquiries and needs.
- **Customized.** Flexible scope of products and services.
- **Stay on top of compliance.** We've got you covered so you never fail to meet evolving regulatory and compliance requirements.
